

3D Static Strength Prediction Program™

Version 5.0.X

Installation Instructions

System Requirements

A Microsoft Windows 2000, or XP operating system is required to run the 3D SSPP program. May run also under Windows 98, ME, and NT depending upon the computer.

Registration Number

A Registration Number to allow the program to operate in either Full 3D or 2D Only modes can be obtained by purchasing a license from:

The University of Michigan
Office of Technology Transfer
3003 South State Street, Suite 2071
Ann Arbor, MI 48109-1280

Tel: (734) 936-0435 Fax: (734) 936-1330

Email: um-software@umich.edu
Please reference File Number 0269.

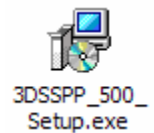

Installation

Note: If the computer system is Windows NT or later, then you must be logged in as an administrator to install software. If help is needed, contact a computer support staff person.

The following instructions assume that you are installing the software onto a local workstation (not a network). Network installation requires a special license.

Installation from a CD

If the software has been obtained on a CD, then insert the CD into the CD drive. If your computer has auto run enabled, the setup program should automatically start. If it doesn't, navigate through Windows to the CD and find the setup file named similar to **Setup_500.exe**. Double-click on the file and follow the on-screen installation instructions.

Installation from a Downloaded File

If the software has been downloaded, locate the setup file with the name similar to **Setup_500.exe** (see above picture) on the computer (desktop, hard drive, or where ever it was saved). Verify that the size downloaded file is the same as that listed on the 3DSSPP website. If it is not, your download may be incomplete or corrupted and the file should be re-downloaded before installation is attempted. Once the file has been successfully downloaded and located, double-click on it and follow the on-screen installation instructions.

Running the Program

If the “Create a Desktop Icon” option was selected during install, double click the 3DSSPP 5.X.X icon on your desktop. If this option was not selected, go to the Start Menu, choose Programs, and select **3DSSPP 5.X.X**. Alternatively you can find the program, 3DSSPP5XX.exe, in C:\ProgramFiles\3DSSPP5XX if the default location was selected during the installation.

Entering Company Name and Registration Number

The first time the program is started, or if a registration number has not been previously entered, the registration dialog will appear. Enter the company name and registration number, and then select the OK button. To operate the program in Demonstration Mode, click the “Demo Mode” button.

To enter a new Registration Number from within the program, select the Registration Dialog under the About Menu. The software license can also be selected and reviewed from the About Menu. A Registration Number purchased for Version 5.X will work in all Version 5 programs.

Demonstration Version

The demonstration mode is completely functional except that the anthropometry is limited to a 5th percentile male. The user Anthropometry Dialog will not allow the height and weight to be changed. The demonstration operation can be converted to full-featured operation with the entry of a valid registration number, described above.

Introductory Screens

Before the data entry windows appear, three screens of general information are displayed, which should be read carefully. After each screen is read, either press the ENTER key or click on the OK button to continue.

After the final information screen, the program will load and display the data entry windows. New data may then be entered or a data file previously saved may be opened.
